

Dover Campus occupies 11 hectares (27 acres) in Clementi, just west of the central business district in an established educational hub. The school opened in an existing school campus in 1971, and features many mature trees and plenty of open spaces.

A US\$60 million facilities upgrade finished in January 2016. This included the construction of a Middle School block with 64 classrooms, a gymnasium and the IDEAS Hub and the new High School block which houses the High School and University Advising office, the secondary library, examination hall, and teaching spaces for English and Drama, including a Black Box theatre. In addition, two existing classroom blocks were extensively refurbished and the Design and Technology, and Visual Arts facilities were upgraded, while the Music Department facilities were extended.

Key environmental aspects of the GreenMark Platinum certified buildings are integrated into the learning programme, which includes the developing 'green heart' central area on campus.

The campus offers the following specialist facilities:

- Infant facilities include classrooms all connected to central pods and outdoor learning and play spaces, a dedicated playground, and specialist teaching facilities for music and the K1 Perceptual Motor Programme
- Junior School classes are in a dedicated block with grade-level shared spaces and specialist teaching facilities for music, languages and art in the building
- two libraries: one for Primary School students, the other for Middle and High School students
- integrated IT facilities with access to a campus-wide wireless network, and a central IT help desk; the 1:1 provision includes iPad and MacBook sets in Primary School classrooms and individually owned laptops in Grades 6–12; interactive whiteboards in all classrooms enabling use of a wide range of specialist teaching aids
- professional-quality performance spaces: heritage-listed main hall seats over 400; other professional-quality smaller spaces include two theatres, a black box theatre and a multi-purpose space seating between 200 and 300
- drama, dance and film teaching rooms and equipment including dedicated wardrobe, lighting and sound technicians and professional standard equipment
- professional-quality music provision includes recording studios, practice rooms, class sets of instruments in the Junior School, an extensive Instrumental Teaching Programme and instrument hire
- sciences block with fully-equipped laboratories
- Design and Technology centre includes curriculum-specific equipment such as 3D printers and laser cutters
- specifically-designed, fully-equipped rooms for visual art including photography darkroom and gallery spaces
- dedicated play areas and equipment for students in the Infant, Junior and Middle schools
- food technology classroom
- extensive sports facilities: one full-sized, all-weather football pitch with covered spectator stand; three additional grass junior pitches and training areas; floodlit 10-lane 50m swimming pool with diving pit and 1m, 2m and 3m boards plus a learn-to-swim pool and covered spectator seating; nine floodlit acrylic tennis courts that incorporate four netball courts; floodlit artificial turf fields for football or hockey; two indoor air-conditioned sports halls including a 20x8m climbing wall; a fully-equipped conditioning gym; a multi-purpose sports room; and a gymnastics training centre incorporating full sprung floor area, vault, bars, beam and foam pits
- high and low ropes courses plus a set of training kayaks
- two residential boarding houses for students aged 13–18
- two canteens with undercover seating and an air-conditioned coffee shop staffed by Sodexo
- 24-hour security
- medical clinics in Primary Block and boarding house both staffed by registered nurses

Set on 5.5 hectares (13.5 acres) in a rapidly developing hub in northeast Singapore, the campus is easily accessed from central, eastern and northern areas of Singapore.

The campus, opened in August 2011, provides a global benchmark in design and innovation in international schools. The distinctive new facility challenges traditional notions of school design and is entirely suited to the unique UWCSEA ethos and educational style.

Layered in order to maximise the use of available space, car and bus transit areas, parking and indoor sport spaces are located below ground level and all traffic is separated from pedestrians. The campus was designed to be easily accessible by people of all ages and abilities and has a universal design award. Key environmental aspects of the GreenMark Platinum certified buildings are integrated into the learning programme.

Specialist facilities include:

- dedicated Infant School with purpose-built facilities including flexible classroom spaces that are accessible to outdoor learning and play areas, grade level 'pods' for creative learning and play, age-appropriate playground, a learn-to-swim pool, specialist teaching facilities for languages, music and cooking, and a multi-purpose hall for physical education, assemblies and performances
- Junior School block with flexible classroom spaces, age-appropriate playground, and specialist teaching facilities for languages, music and art
- two libraries equipped as state-of-the-art resource centres—one for the Primary School and one for students in Middle and High School
- integrated IT facilities with access to a campus-wide wireless network, and a central IT help desk; the 1:1 provision includes iPad and MacBook sets in Primary School classrooms and individually owned laptops in Grades 6–12; interactive whiteboards in all classrooms enabling use of a wide range of specialist teaching aids
- visual art facilities including art rooms, a darkroom and photography studio, and a ceramics studio
- drama, dance and film teaching rooms and equipment including dedicated wardrobe, lighting and sound technicians and professional standard equipment
- professional-quality performance venues: a tiered auditorium with 420 seats, a black box theatre seating 270, and a multi-purpose main hall seating up to 500
- professional-standard specialist music facilities: studios, practice rooms, recording studios and teaching facilities, an Instrumental Teaching Programme and instrument hire, as well as a Balinese gamelan orchestra
- fully-equipped science laboratories
- fully-equipped Design and Technology workshops and the Community Lab, a collaborative makerspace for use by the school and neighbouring community
- dedicated food technology facilities linked with the school canteen
- canteen and undercover seating, with onsite Sodexo catering including an air-conditioned coffee shop
- extensive sports facilities: 10-lane 50m Olympic-sized pool with covered spectator seating; floodlit, all-weather field that meets FIFA 2\* and IRB international standards with covered spectator seating; three air-conditioned indoor sports halls; a fully-equipped gymnastics centre; well-equipped fitness centre for cardiovascular conditioning and weight training; two large studios for fitness and dance classes; and a CrossFit training room
- covered outdoor climbing wall plus a set of training kayaks
- purpose-built boarding house for students aged 13–18 (Grades 8–12)
- 24-hour security
- medical clinics next to the Primary Block and in boarding house are both staffed by registered nurses
